

KUHYAR SAEEDI

Machine Learning & Automation Engineer

📍 Rome, Italy | 📞 +39 349 975 2369 | ✉ saeedi.kuhyar@gmail.com | 💻 www.linkedin.com/in/kuhyar | 🐙 www.github.com/kuhyar-saeedi

SUMMARY

Software Engineering graduate currently pursuing an M.Sc. in Management Engineering at Tor Vergata, focused on machine learning, automation, and data-driven Digital Twin systems. Hands-on experience building Python projects in NLP, computer vision, predictive modeling, browser automation, and industrial AI applications.

EXPERIENCE

Independent AI & Automation Projects

📅 2022 – Present

- Developed Python-based ML and automation projects in NLP, computer vision, predictive modeling, and web automation
- Built browser automation tools, workflow systems, and scraping pipelines using Selenium and Python
- Implemented preprocessing, feature engineering, model evaluation, and Git/GitHub-based project workflows

Industrial AI & Defect Detection Systems (Python, ResNet18, TensorFlow, Scikit-learn)

- Developed CNN-based industrial defect detection systems using transfer learning
- Built predictive ML models for electroplating coating property estimation using preprocessing, feature engineering, and regression pipelines

NLP & Intelligent Text Processing Systems (Python, Transformers, NLP, PyTorch)

- Built NLP models for Named Entity Recognition, sentiment analysis, spam classification, and text summarization
- Implemented preprocessing, tokenization, and training pipelines for automated text analysis

Browser Automation & Scheduling Bot (Python, Selenium, Telegram API)

- Built automated browser workflows for appointment monitoring, form interaction, and repetitive web tasks
- Integrated Telegram notifications for real-time updates and workflow status tracking

EDUCATION

Bachelor's Degree in Computer Software Engineering

University of Urmia 📅 Sep 2012 – Sep 2017

Master's Degree in Management Engineering

University of Rome Tor Vergata 📅 Sep 2025 – Expected Sep 2027

Relevant Coursework: AI Applications in Manufacturing (30/30 with honors), Digital Economy (29/30)

TECHNICAL SKILLS

Programming: Python, R, C++, C#

AI/ML Technologies: Machine Learning, Deep Learning, NLP, Computer Vision, Transformers, CNNs, Transfer Learning

Libraries & Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, SciPy, Matplotlib, Seaborn

Automation & Data: Selenium, Web Scraping, REST APIs, Browser Automation, Workflow Automation

Tools: Git, Jupyter Notebook, MySQL

ONLINE LEARNING

100 Days of Code, The Complete Python Pro Bootcamp By Angela Yu
Udemy

Become a Machine Learning Engineer Path
Educative

Become a Deep Learning Engineer Path
Educative

CERTIFICATION

TOEFL iBT: 103(R:25 L:25 S:28 W:25)

GRE: 311(Quantitative: 161 Verbal: 150)

LANGUAGES

Persian, Kurdish: Native

English: C1

French: B2

Italian: B2

German: A2

INTERESTS

Language Learning – 1930+ day [Duolingo streak](#)
